2. mednarodni simpozij

Organ Sparing Treatment in Oncology

Ljubljana
14. 6. – 19. 6. 2000

The organ sparing approach to tumor treatment represents a challenge to every clinical oncologist concerned with the quality of patients life. With modern understanding of tumor biology, the possibility to devise an efficient combined modality treatment with cytotoxic drugs, radiotherapy and surgery becomes ever more likely. This symposium is intended to promote the exchange of experience gathered in this field by various clinical oncologists.

Speakers:

- Breast cancer**
M. Blichert-Toft (Denmark)
G. Viale (Italy)
- Rectal Cancer**
W. J. Temple (Canada)
- Sarcomas**
W.J. Temple (Canada)
- Quality of life**
I. Tannock (Canada)

Preliminary program: **Thursday, September 14, 2000**

Registration
Welcome reception

Friday, September 15, 2000

Morning Session
Breast cancer
Satellite symposium
Afternoon session
Rectal cancer
Satellite symposium

Saturday, September 16, 2000

Morning Session
Miscellaneous tumors
Afternoon session
Quality of life

Simpozij bo v celoti v angleškem jeziku.
