

**Prof. Vesna Zadnik, MD, PhD**

**CURRICULUM VITAE**

Prof. Vesna Zadnik, MD, PhD has been a public health specialist and a doctor of science in the field of epidemiology since 2006. She is the Head of the Epidemiology Unit at the Institute of Oncology Ljubljana since 2006 and since 2018 director of Cancer Registry of Slovenia. She leads and carries out detail epidemiology analysis in order to elucidate a certain condition, e.g. cancer incidence, time series, spatial distribution, survival of cancer patients, efficiency of cancer screening programs, etc. In written and oral presentations she keeps the general and the political public informed of new findings, publishes systematically in scientific journals and gives lectures at international conferences. She is a university professor and mentor for master, doctoral and resident theses.
