Aims and Scope

Association of Radiology and Oncology and Co-chairs invite you to participate at the 4th Conference on Experimental and Translational Oncology which will be held in Kranjska gora, Slovenia, March 22–26, 2006. The aim of the Conference is to promote the achievements of basic and clinical investigators on mechanisms of tumour development and progression and the introduction of new strategies for detection and treatment of cancer. Lectures, short oral presentations, selected from submitted abstract and poster presentations will cover five major Conference topics:

- Mechanisms of tumour progression
- Tumour markers
- Delivery systems in cancer therapy
- New drugs and therapeutic targets
- Immune response and cancer

The Conference is an ideal place for gathering of young prospective scientists with established colleagues, to enforce the collaboration between academic and industrial institutions and to make new contacts between scientists from different European regions.
