

Subject Index 2005

- 1,2-dimethylhydrazine: 1/61-70
- abscess: 4/249-252
- anemia - drug therapy: 2/133-140
- angiogenesis factor: 4/253-259
- angiography - adverse effects: 2/153-158
- anus diseases: 4/249-252
- appendicitis-ultrasonography: 1/15-21
- axillary artery-injuries-ultrasonography-surgery: 1/9-13
- azoxymethane: 1/61-70
- biopsy, needle: 1/37-47; 4/269-272
- breast neoplasms - genetics: 2/147-152
- bulbourethral glands-abnormalities: 1/1-4
- calcinosis: 3/185-191
- cancer vaccines: 4/261-268
- carcinoid tumor: 3/193-196
- CD4 - positive T - lymphocytes: 4/261-268
- cell count: 4/269-272
- child: 1/1-4; 1/15-21
- chromosome aberrations: 2/153-158
- colorectal neoplasms - chemically induced: 1/61-70
- comparative study: 4/273-278
- coronary vessels: 3/185-191
- cysts: 3/177-180
- cytodiagnosis: 4/269-272
- diagnosis, differential: 4/249-252
- diamond detector, intensity modulated radiotherapy: 1/71-78
- disease models, animal: 1/61-70
- duodenum-abnormalities: 3/181-184
- endoscopy: 3/193-196
- endosonography: 3/171-175; 4/249-252
- epoetin alfa: 2/133-140
- gallbladder diseases - ultrasonography: 4/243-247
- genes, BRCA1: 2/147-152
- genes, tumor suppressor: 3/197-210
- head and neck neoplasms-radiotherapy: 3/219-224
- ideal diseases: 2/91-94
- immunotherapy, adoptive: 4/261-268
- intensive care units: 4/243-247
- intestinal neoplasms-diagnosis: 3/193-196
- intussusception: 2/91-94
- kidney neoplasms - diagnosis: 1/23-35
- lung neoplasms: 1/49-53
- lung neoplasms - diagnosis - therapy: 2/115-121
- lung neoplasms-genetics: 3/197-210
- lymphocytes: 2/153-158
- magnetic resonance imaging: 1/23-35
- maxillary neoplasms - radiography: 2/95-99
- Meckel's diverticulum: 2/91-94
- mesothelioma - surgery - drug therapy - radiotherapy: 2/123-131
- micronucleus tests: 2/153-158
- mutation: 2/147-152
- myocardial infarction: 3/185-191
- neoplasm metastasis - radiotherapy: 2/141-146
- neoplasms: 4/261-268
- neoplasms - blood supply: 4/253-259
- neoplasms - pathology: 4/269-272
- neoplasms invasiveness: 1/55-59
- neoplasms staging: 1/23-35
- neoplasms, multiple primary: 1/49-53
- neovascularisation, pathologic: 4/253-259
- osteosarcoma: 2/95-99
- parietal bone: 1/55-59
- pleural effusion: 4/237-243
- pleural neoplasms: 2/123-131
- pleura-ultrasonography: 1/5-8
- polymerase chain reaction: 2/147-152
- postoperative complications: 4/243-247
- pregnancy: 1/5-8
- preschool: 1/1-4
- prognosis: 4/253-259
- prostate-specific antigen: 1/37-47
- prostatic neoplasms: 3/211-217
- prostatic neoplasms - pathology: 1/37-47
- prostatic neoplasms D radiotherapy: 4/273-278
- pulmonary embolism - diagnosis: 2/101-114
- pylorus-abnormalities: 3/181-184
- radiotherapy: 1/71-78
- radiotherapy dosage: 1/71-78; 3/219-224
- radiotherapy planning: 4/273-278
- radiotherapy, conformal: 3/211-217; 4/273-278
- rats: 1/61-70
- rectal disease-ultrasonography-surgery: 3/177-180
- rectal fistula-diagnosis: 3/171-175
- rectal neoplasms: 4/249-252
- rectal neoplasms - radiotherapy - drug therapy: 2/133-140
- recurrence: 3/171-175
- spinal cord compression: 2/141-146
- survival analysis: 2/115-121
- sweat gland neoplasms: 1/55-59

T - lymphocytes, helper - inducer: 4/261-268
thoracic radiography: 4/237-243
thrombectomy: 1/9-13
thrombosis: 1/9-13
thymoma: 2/141-146
tomography: 3/185-191

X-ray computed: 3/185-191
X-ray computed - methods: 2/101-114
